

ABSTRACT OF THE DISCLOSURE UNDER 37 C.F.R. §1.72(b)

A subscriber class leases and provides programming for a digital television channel using the two way communication capabilities of a digital set-top box. Programming content is uploaded by members of the subscriber class to a service provider using upstream communication such as a cable modem forming a part of the set-top box. A schedule arbiter schedules the programming and the programming is multicast to the class of subscribers for playback.
